Learning and Teaching Resources (UNDER CONSTRUCTION)

"Learning through health and wellbeing promotes confidence, independent thinking and positive attitudes and dispositions. Because of this, it is the responsibility of every teacher to contribute to learning and development in this area."

(Building the curriculum 1)

All staff in early years centres and schools work together with community partners to achieve the common goal of improving the health and wellbeing and life chances of our children and young people. Responsibility of All describes the importance of embedding health and wellbeing across learning, whether this takes place within the school or other learning environment, at home or in the wider community.

Responsibility of All
